§ 1 INVESTMENT THESIS

Intuit is the dominant financial management platform for US small businesses (QuickBooks, 7M+ SMB customers) and consumers (TurboTax, 40M+ annual filers) — a two-sided financial data flywheel that is structurally protected by tax compliance switching costs and IRS partnership. The Credit Karma acquisition ($7.1B, 2020) added 130M consumer financial health profiles — creating a data asset for personalised financial product recommendations (credit cards, personal loans, auto insurance, mortgages) at near-zero customer acquisition cost. Intuit's AI strategy ('AI-driven expert platform') is unique: rather than replacing human accountants and tax preparers, Intuit is building AI tools that enhance accountant productivity — keeping the professional as the trusted advisor while Intuit captures the software layer. QuickBooks is evolving into an AI-powered business operating system: automated bookkeeping (Intuit Assist), cash flow forecasting, payroll

(QuickBooks Payroll), and payments (QuickBooks Payments) — each product creates switching costs that compound over years.

🟩 BL Signal: 90d target $410.71 (+21.4%) | P=69.0% | BL Score: 19.0000 | Regime: RISK OFF

§ 2 BUSINESS MODEL ARCHITECTURE

Revenue: Small Business & Self-Employed (QuickBooks Online, Desktop, Payments, Payroll, Capital) ~60%; Consumer (TurboTax, TurboTax Live) ~25%; Credit Karma (financial marketplace commissions) ~10%; ProConnect (accountant tax platform) ~5%. TurboTax: market leader in US online tax filing; $100-300/filing depending on complexity; TurboTax Live (expert assistance) commands premium pricing; IRS Free File litigation risk ($400M settlement). QuickBooks: $30-180/month SMB subscriptions; 7M+ small business customers; Payments (1.8% + $0.25/transaction) and Payroll add margin. Credit Karma: 130M members; commission-based revenue when members apply for/approve financial products; growing revenue from high-margin referrals.

---

§ 3 COMPETITIVE MOAT ANALYSIS

Tax compliance moat: TurboTax has 25+ years of customer tax history per user — state-by-state tax rules, deduction patterns, and prior year data that make switching to H&R Block or TaxSlayer a guaranteed inferior first-year experience. SMB accountant network: 700,000+ accounting professionals certified in QuickBooks — recommending QuickBooks to every SMB client creates a professional endorsement moat that competitors must overcome. IRS data integration: TurboTax directly imports W-2s, 1099s, and prior year IRS transcripts — a data access privilege that free competitors cannot offer. QuickBooks switching cost: A small business that has 5 years of QuickBooks transaction history, payroll records, and tax documentation cannot migrate to Xero or Wave without significant data conversion costs and operational disruption.

Porter's Five Forces — Technology & Software Sector

FORCE	ASSESSMENT
Rivalry	MEDIUM-HIGH — Platform wars (AWS/Azure/GCP in cloud); SaaS consolidation (MSFT/SFDC/NOW); AI-native startups disrupt incumbents. Endpoint security: CRWD vs PANW vs MSFT Defender. Intense but rational — high switching costs prevent price commoditisation.
New Entrants	MEDIUM — Software has low physical capital requirements. BUT: AI model training costs ($100M+), talent scarcity, distribution (enterprise sales), and incumbent data advantages create high de facto barriers. Cloud hyperscalers can enter any SaaS market.
Supplier Power	LOW-MEDIUM — GPU compute (NVIDIA near-monopoly on H100/B200) is the primary scarce input; TSMC for custom silicon. Talent market remains tight. Cloud

	infrastructure commoditising. Software-defined = supplier power is manageable.
Buyer Power	MEDIUM — Enterprise SaaS buyers sign 3-5yr contracts with switching costs; individual consumers switch freely. Large enterprises (Fortune 500 IT budgets $500M+) have bargaining power in multi-year platform negotiations.
Substitutes	MEDIUM-HIGH — Open-source software (Linux, PostgreSQL, PyTorch) free alternatives; AI coding tools reducing custom software development cost; platform consolidation (buy Microsoft E5 vs 30 point vendors). Competitive substitution risk is real but switching cost mitigates.

§ 4 FINANCIAL ANALYSIS

All data from BL3 MySQL (snapshot: 2026-08-14) + moomoo OpenD. Zero training-data figures. CIO Standing Order 2026-08-13.

4.1 Valuation Metrics

P/E TTM: 20.63x — profitable on trailing basis.

Forward P/E: 24.74x

§ 5 RISK FRAMEWORK

Five risk factors assessed within the CivilisationOS Bayesian risk architecture.

RISK FACTOR	SEVERITY	DESCRIPTION
IRS Free Tax Filing	**HIGH**	IRS Direct File launched in 2024 in 12 states; if expanded nationally, TurboTax basic filers ($50B+ market) are addressable by zero-cost government competition.
QuickBooks Desktop End-of-Life	**MEDIUM**	QuickBooks Desktop discontinuation (QBD 2024 = final version) may create churn as some SMBs prefer desktop; online QBO migration is not 1:1.
Credit Karma Revenue Cyclicality	**MEDIUM**	Credit card and personal loan originations are highly correlated with interest rate cycles; high rates compress Credit Karma referral revenue.
Xero Competition (International)	**MEDIUM**	Xero leads in UK, Australia, New Zealand; QuickBooks international expansion faces well-entrenched competitors.
AI Tax Disruption	**HIGH**	If AI (Claude, GPT) enables consumers to file taxes autonomously at zero cost, TurboTax 40M user base faces disintermediation threat long-term.

§ 6 BLUE LOTUS SUPERFORECASTING

Intuit Assist (AI bookkeeping automation) reduces SMB manual bookkeeping burden by 50-70% — increasing QuickBooks retention and enabling price increases. Credit Karma rate-cycle recovery: personal loan originations recover as rates decline 2025-2026, restoring Credit Karma to $2B+ revenue. By 2028: QuickBooks 10M+ SMB subscribers at higher ARPU; TurboTax Live 15M+ paid assisted filers; Credit Karma $2.5B+ revenue. By 2033: Intuit as the SMB financial OS — bookkeeping, taxes, payroll, payments, lending, and financial advice in a unified platform; AI handles 80% of bookkeeping without human involvement. By 2038: 30M+ SMBs globally on the QuickBooks ecosystem; Intuit's AI-powered financial advice is the de facto CFO for businesses under $10M revenue.

SCENARIO	HORIZON	PRICE TARGET	PROBABILITY	RATIONALE
■ **BULL 2028**	2028 (~2yr)	$548.83	30%	AI-driven revenue acceleration; TAM expansion; multiple re-rating.
■ **BASE 2028**	2028 (~2yr)	$388.33	45%	BL 90-day trajectory sustained; sector growth on track.
■ **BEAR 2028**	2028 (~2yr)	$264.05	25%	AI hype cycle correction; macro slowdown; multiple compression.
■ **BULL 2033**	2033 (~7yr)	$1838.44	25%	Platform dominance; AI monetisation fully realised; FCF compounding.
■ **BASE 2033**	2033 (~7yr)	$547.78	50%	Steady growth; competitive dynamics normalise; dividend initiation.
■ **BEAR 2033**	2033 (~7yr)	$142.00	25%	Regulatory fragmentation; disruptive entrant captures TAM.
■ **BULL 2038**	2038 (~12yr)	$6158.35	20%	AI-first economy; this platform is the operating system of the era.
■ **BASE 2038**	2038 (~12yr)	$772.72	55%	Mature platform; steady FCF; global expansion complete.
■ **BEAR 2038**	2038 (~12yr)	$76.37	25%	New technology paradigm disrupts current platform economics.

Note: BL 90-day trajectory compounded annually where available; qualitative multiple otherwise. CIO price 2026-08-13. NOT investment advice.
