§ 1 INVESTMENT THESIS

First Majestic Silver is one of the world's purest silver-focused mining companies, producing approximately 30-35 Moz silver equivalent per year from three operating mines in Mexico and the United States. The flagship Jerritt Canyon Gold Mine (Nevada, USA, acquired from Sprott in 2021) added a US gold asset to the predominantly Mexican silver portfolio. First Majestic is most famous for its direct silver bullion sales through its proprietary online store — a unique direct-to-investor silver channel that creates brand loyalty and premium pricing capture above spot. The company is among the most silver-leveraged publicly traded names: when silver rallies, First Majestic typically outperforms its peers by 2-3× due to operational leverage at its Mexican silver mines (San Dimas, Santa Elena).

🟩 BL Signal: 90d target $12.06 (-35.2%) | P=64.8% | BL Score: 14.7500 | Regime: MILD RISK ON

§ 2 BUSINESS MODEL ARCHITECTURE

Three operating mines: (1) San Dimas (Mexico, 100%); silver-gold underground; ~10-12 Moz AgEq/year; (2) Santa Elena (Sonora, Mexico, 100%); silver-gold open pit and underground; ~8-10 Moz AgEq/year; (3) Jerritt Canyon (Nevada, USA, 100%); gold underground; ~60-70 Koz Au/year (underperforming; review ongoing). Revenue: silver doré and concentrate (LBMA spot); gold doré (spot); First Majestic Store (direct retail silver sales at spot + 5-10% premium — unique in mining sector). First Majestic holds significant physical silver bullion as a strategic reserve — management committed to silver bull market thesis.

§ 3 COMPETITIVE MOAT ANALYSIS

San Dimas (originally acquired from Primero Mining) is one of Mexico's most storied silver mines — 130+ years of continuous production history, well-understood geology, and established water and power infrastructure. Santa Elena open pit + underground provides flexible ore sourcing. The First Majestic Silver Store is a unique competitive differentiator: direct silver bullion sales to retail investors at above-spot pricing, building a silver brand that reinforces equity investor loyalty. CEO Keith Neumeyer's public silver bull advocacy creates a retail investor following that supports stock liquidity.

Porter's Five Forces — Gold & Silver Mining

FORCE	ASSESSMENT
Rivalry	HIGH — Top 5 gold majors (Newmont, Barrick, Agnico, AngloGold, Gold Fields) compete for acquisition targets and investor capital.
New Entrants	LOW — Mine permitting 10-20 years; sovereign risk; metallurgical complexity; capital intensity ($500M-$5B+) deter new entrants.
Supplier Power	MEDIUM — Reagents (cyanide, lime), explosives, and mining equipment (Caterpillar, Sandvik) — multi-year contracts; limited alternatives.
Buyer Power	LOW-MEDIUM — Gold/silver sell at spot (LBMA/COMEX); no single buyer; refiners and central banks buy at market price.
Substitutes	LOW — No substitute for gold/silver in monetary, investment, or industrial applications (conductivity, corrosion resistance).

§ 4 FINANCIAL ANALYSIS

All data from BL3 MySQL (snapshot: 2026-08-13) + moomoo OpenD. Zero training-data figures. CIO Standing Order 2026-08-13.

4.1 Valuation Metrics

P/E TTM: 26.94x — profitable on trailing basis.

Forward P/E: 55.47x

Price/Book: 3.13x

Net Income TTM: $167.59M | Source: BL3 MySQL

EPS TTM: $0.34 | EPS Forward: $6.02

4.2 52-Week Price Range

52-Week High: $32.01 | 52-Week Low: $8.32

CIO Price $18.610 at 43.4% of 52W range | Source: BL3 MySQL

4.3 Analyst Intelligence

Consensus: Buy | Target: $25.28 | Analysts: 4

Buy: 75% | Hold: 25% | Sell: 0%

Analyst Upside: +35.8%

§ 5 RISK FRAMEWORK

Five risk factors assessed within the CivilisationOS Bayesian risk architecture.

RISK FACTOR	SEVERITY	DESCRIPTION
Mexico Political Risk	HIGH	San Dimas and Santa Elena in Mexico; López Obrador legacy moratorium; new permit delays.

Jerritt Canyon Performance	**HIGH**	Nevada gold mine has consistently underperformed; potential divestiture or write-down.
Silver Price Leverage	**HIGH**	First Majestic is among the most volatile silver stocks; high beta to metal price.
Mexico Royalty Risk	**MEDIUM**	Mining royalty structure changes in Mexico could increase cost burden.
Hedging Policy	**MEDIUM**	First Majestic deliberately avoids hedging (CEO philosophy); full exposure to downside moves.

§ 6 BLUE LOTUS SUPERFORECASTING

Jerritt Canyon operational improvement or sale would be value-unlocking — removing the underperforming asset drags. San Dimas and Santa Elena at $30+/oz silver generate meaningful FCF given their established infrastructure. By 2028: If silver reaches $40-50/oz, First Majestic is the highest-beta silver equity — potential 3-5× from current levels. By 2033: First Majestic could be an acquisition target for a senior producer seeking pure silver exposure. By 2038: The silver direct-to-consumer model could scale to a meaningful revenue stream beyond mining.

SCENARIO	HORIZON	PRICE TARGET	PROBABILITY	RATIONALE
■ **BULL 2028**	2028 (~2yr)	$18.26	30%	Gold $3,000+ / Silver $40+; all expansion catalysts hit.
■ **BASE 2028**	2028 (~2yr)	$14.50	45%	Gold $2,500-2,800; silver $28-35; BL trajectory sustained.
■ **BEAR 2028**	2028 (~2yr)	$14.52	25%	Gold correction to $1,800-2,000; risk-on reduces safe haven flows.
■ **BULL 2033**	2033 (~7yr)	$17.42	25%	De-dollarisation accelerates; gold $3,500-4,000; silver re-rated.
■ **BASE 2033**	2033 (~7yr)	$7.77	50%	Gold $3,000+; steady mine production; FCF compounding.
■ **BEAR 2033**	2033 (~7yr)	$7.81	25%	Global deflation; USD strengthens; precious metals de-rated.

■ **BULL 2038**	2038 (~12yr)	$16.62	20%	Gold $5,000+; silver $80+; multipolarity fully priced in.
■ **BASE 2038**	2038 (~12yr)	$4.16	55%	Gold $3,500-4,500; mature production; dividends sustained.
■ **BEAR 2038**	2038 (~12yr)	$4.20	25%	New energy metal replaces gold as safe haven; gold de-rated.

Note: Projections use BL 90-day trajectory compounded annually. Base prices from CIO watchlist 2026-08-13. NOT investment advice.
