§ 1 INVESTMENT THESIS

Newmont Corporation is the world's largest gold mining company by production, reserves, and market capitalisation — producing ~6.0-6.5 Moz Au equivalent/year from 17+ operating mines across six continents. Following the landmark acquisition of Newcrest Mining (2024, ~$19 billion), Newmont added three world-class Australian and Papua New Guinea assets: Cadia (New South Wales — one of the world's largest and lowest-cost gold-copper mines), Telfer (Western Australia), and Lihir (Papua New Guinea — one of the world's largest gold mines by reserve at 40+ Moz Au). Newmont's Nevada Gold Mines JV (38.5% interest, operated by Barrick) provides exposure to the world's largest gold mining complex alongside its own Carlin-trend operations. As the bellwether gold equity, Newmont is the primary instrument through which institutional investors access gold mining leverage. At $2,500+/oz gold, Newmont generates $4-6B+ in annual FCF — among the largest FCF generators in the entire mining sector.

§ 2 BUSINESS MODEL ARCHITECTURE

Six production regions (post-Newcrest): (1) North America — Carlin Trend (Nevada, Nevada Gold Mines JV 38.5%); CC&V (Colorado); Phoenix (Nevada); Musselwhite (Canada); Éléonore (Canada); Porcupine (Canada); (2) South America — Yanacocha (Peru, 51.35%); Merian (Suriname, 75%); Cerro Negro (Argentina); (3) Australia — Cadia (NSW, 100%); Boddington (WA); Telfer (WA); (4) Africa — Ahafo (Ghana); Akyem (Ghana); (5) Papua New Guinea — Lihir (Papua New Guinea, 100%); Wafi-Golpu (PNG, 50% JV); (6) Nevada Gold Mines — JV with Barrick (operated by Barrick). Revenue: gold bullion, gold-silver concentrate, copper credit. Dividend: $1.00/share annual base dividend + variable dividend at $1,800+/oz gold price tiers.

---

§ 3 COMPETITIVE MOAT ANALYSIS

Newmont's scale moat — 6 Moz/year from 17 mines — creates operational breadth that insulates against single-mine disruptions. Cadia (Newcrest acquisition) is one of the three lowest-cost gold mines in the world at negative AISC (copper by-product fully offsets gold production costs). Lihir (40+ Moz Au reserve) is one of the world's largest gold deposits with 30+ year mine life in a geothermally-active high-grade deposit — irreplaceable. Newmont's investment-grade balance sheet (A-rated), largest gold exploration budget ($350M+/year), and project pipeline sustain industry-leading reserve replacement.

Porter's Five Forces — Gold & Silver Mining

FORCE	ASSESSMENT
Rivalry	HIGH — Top 5 gold majors (Newmont, Barrick, Agnico, AngloGold, Gold Fields) compete for acquisition targets and investor capital.
New Entrants	LOW — Mine permitting 10-20 years; sovereign risk; metallurgical complexity; capital intensity ($500M-$5B+) deter new entrants.
Supplier Power	MEDIUM — Reagents (cyanide, lime), explosives, and mining equipment (Caterpillar, Sandvik) — multi-year contracts; limited alternatives.
Buyer Power	LOW-MEDIUM — Gold/silver sell at spot (LBMA/COMEX); no single buyer; refiners and central banks buy at market price.
Substitutes	LOW — No substitute for gold/silver in monetary, investment, or industrial applications (conductivity, corrosion resistance).

§ 4 FINANCIAL ANALYSIS

All data from BL3 MySQL (snapshot: 2026-08-13) + moomoo OpenD. Zero training-data figures. CIO Standing Order 2026-08-13.

4.1 Valuation Metrics

P/E TTM: 14.55x — profitable on trailing basis.

Forward P/E: 18.06x

Price/Book: 3.45x

Net Income TTM: $6.73B | Source: BL3 MySQL

EPS TTM: $6.39 | EPS Forward: $33.45

4.2 52-Week Price Range

52-Week High: $134.29 | 52-Week Low: $66.49

§ 5 RISK FRAMEWORK

Five risk factors assessed within the CivilisationOS Bayesian risk architecture.

RISK FACTOR	SEVERITY	DESCRIPTION
Newcrest Integration Complexity	HIGH	Integrating $19B acquisition across 3 new countries (Australia, PNG,

		Canada) is operationally demanding.
Cost Inflation	HIGH	Labour, energy, and consumable inflation has driven AISC above $1,400/oz; FCF sensitivity to costs.
Papua New Guinea Political Risk	MEDIUM	Lihir and Wafi-Golpu in PNG; resource nationalism and tax/royalty renegotiation history.
Yanacocha Water Rights (Peru)	MEDIUM	Yanacocha Sulfides expansion requires water rights; social license in Cajamarca is fragile.
Asset Divestiture Programme	MEDIUM	Post-Newcrest, Newmont divesting non-core assets (Telfer, Musselwhite); execution risk.

§ 6 BLUE LOTUS SUPERFORECASTING

Newcrest integration milestones (Cadia Block Cave ramp, Lihir process plant upgrade) are 2025-2027 catalysts. Cadia Block Cave expansion (CC1) adds ~300,000 oz Au + 90,000 t Cu/year at negative AISC — among the best project economics in mining. By 2028: Newmont at 7.0+ Moz Au equivalent; Cadia copper credits drive FCF expansion; Lihir plant upgrade improves recovery rates. By 2033: Lihir at sustained high-capacity production; Wafi-Golpu potentially in development (PNG copper-gold porphyry). By 2038: Newmont as a multi-decade gold major with the largest verified gold reserve base of any company on Earth — the definitive institutional gold equity.

SCENARIO	HORIZON	PRICE TARGET	PROBABILITY	RATIONALE
■ **BULL 2028**	2028 (~2yr)	$176.46	30%	Gold $3,000+ / Silver $40+; all expansion catalysts hit.
■ **BASE 2028**	2028 (~2yr)	$126.10	45%	Gold $2,500-2,800; silver $28-35; BL trajectory sustained.
■ **BEAR 2028**	2028 (~2yr)	$89.02	25%	Gold correction to $1,800-2,000; risk-on reduces safe haven flows.
■ **BULL 2033**	2033 (~7yr)	$525.09	25%	De-dollarisation accelerates; gold $3,500-4,000; silver re-rated.
■ **BASE 2033**	2033 (~7yr)	$161.98	50%	Gold $3,000+; steady mine production; FCF compounding.

■ **BEAR 2033**	2033 (~7yr)	$47.87	25%	Global deflation; USD strengthens; precious metals de-rated.
■ **BULL 2038**	2038 (~12yr)	$1562.45	20%	Gold $5,000+; silver $80+; multipolarity fully priced in.
■ **BASE 2038**	2038 (~12yr)	$208.07	55%	Gold $3,500-4,500; mature production; dividends sustained.
■ **BEAR 2038**	2038 (~12yr)	$25.75	25%	New energy metal replaces gold as safe haven; gold de-rated.

Note: Projections use BL 90-day trajectory compounded annually. Base prices from CIO watchlist 2026-08-13. NOT investment advice.
