§ 1 INVESTMENT THESIS

Cameco is the world's second-largest uranium producer and the Western world's dominant uranium supplier, controlling Tier-1 assets in the Athabasca Basin (McArthur River/Key Lake, Cigar Lake) that together represent the highest-grade uranium deposits on Earth. The nuclear renaissance thesis is driven by three converging forces: (1) AI datacentre power demand requiring 24/7 carbon-free electricity, driving hyperscaler nuclear PPAs (Microsoft-TMI, Google-Kairos, Amazon-X-energy); (2) global net-zero commitments requiring reliable baseload to back intermittent renewables; (3) post-Fukushima reactor restarts (Japan, South Korea) and new builds (India, China, Eastern Europe). Cameco's strategic 49% ownership of Westinghouse Electric (acquired 2023 with Brookfield) adds reactor technology to uranium supply — making Cameco the vertically integrated nuclear fuel cycle leader.

■ Blue Lotus Forecast Signal: 90-day price target \$65.62 (upside -33.4%) | P(target reached): 64.8% | BL Score: 14.7500 | Regime: MILD RISK OFF

§ 2 BUSINESS MODEL ARCHITECTURE

Four revenue pillars: (1) Uranium — long-term contracts for U3O8 delivery to utilities globally; McArthur River/Key Lake restart (2022) and Cigar Lake at full production; spot market opportunism when prices favour; (2) Fuel Services — conversion and enrichment services for nuclear fuel fabrication; Port Hope and Blind River UF6 conversion; (3) Westinghouse stake — AP1000 reactor technology, maintenance, services for 500+ reactors globally; engineering backlog; (4) Corporate Exploration — early-stage uranium and nuclear assets. Long-term contracts (10-15 year) provide revenue predictability; escalation clauses protect against inflation.

§ 3 COMPETITIVE MOAT ANALYSIS

Athabasca Basin assets are irreplaceable: McArthur River averages 6-7% U3O8 grade (world average: ~0.1%), making Cameco the lowest-cost hard-rock uranium miner. Licensing, permitting, and community relationships in Athabasca took 30+ years — any new entrant faces the same timeline. Westinghouse is the global reactor technology standard (AP1000 is the Western large-reactor benchmark); 50%+ of US reactors run on Westinghouse fuel design. Long-term utility contracts at \$50-65/lb U3O8 lock in premium pricing well above spot during downturns.

Porter's Five Forces — Critical Materials

FORCE	ASSESSMENT
Rivalry (Industry Competition)	HIGH — Critical materials sector dominated by Chinese state-owned enterprises; Western producers compete with subsidised rivals.
Threat of New Entrants	HIGH — Resource permitting (5-15 years), capex (\$200M-\$2B), and processing expertise create barriers, but timelines matter.
Supplier Power	MEDIUM — Equipment and reagent suppliers; specialised SX-EW and REE separation reagents have limited Western sources.
Buyer Power	MEDIUM-HIGH — Large OEM buyers (GM, Ford, Boeing) have significant negotiating power; government buyers less price-sensitive.
Substitutes	MEDIUM — Battery chemistry evolution (NaS, LMFP) could reduce lithium/cobalt intensity; but REE magnets have no

viable substitute for high-power density.

§ 4 FINANCIAL ANALYSIS

All financial data sourced from BL3 MySQL (snapshot: 2026-08-13) and moomoo OpenD API as at 2026-08-13. Zero training-data market figures used per CIO Absolute Market Data Standing Order 2026-08-13.

4.1 Valuation Metrics

P/E TTM: 169.79x — company is profitable on trailing basis.

Forward P/E: 101.91x — analyst consensus expects forward profitability.

Price/Book: 8.39x — market applies 8.39x premium to book assets.

Net Income TTM: \$421.60M | Source: BL3 MySQL net_income_ttm

EPS TTM: \$0.97 | EPS Forward Estimate: \$11.75

4.2 52-Week Price Range

52-Week High: \$135.24 | 52-Week Low: \$68.82

Current Price \$98.555 sits at 44.8% of 52-week range (0%=52W Low, 100%=52W High) | Source: BL3 MySQL high_52w / low_52w

4.3 Wall Street Analyst Intelligence

Analyst Consensus: Buy | Price Target: \$125.69 | Analysts Surveyed: 9

Buy: 88% | Hold: 11% | Sell: 0%

Analyst Upside vs CIO Price: +27.5%

§ 5 RISK FRAMEWORK

The following five risk factors have been assessed across probability and severity dimensions within the CivilisationOS Bayesian risk architecture.

RISK FACTOR	SEVERITY	DESCRIPTION
Uranium Price Volatility	MEDIUM	Uranium spot market is thin; price can move 30-50% on sentiment shifts.
Mine Production Risk	MEDIUM	Cigar Lake ground conditions and McArthur restart execution risk.
Westinghouse Integration	MEDIUM	Integration complexity and leverage taken on for Westinghouse acquisition.
Policy Risk — Nuclear Phase-Out	LOW	Germany-style nuclear exit remains possible in key markets, though trend is reversing.
Geopolitical Risk — Russia	MEDIUM	TENEX/Rosatom competition in enrichment; US ban on Russian uranium partially implemented.

§ 6 BLUE LOTUS SUPERFORECASTING

Uranium demand surge from nuclear restarts and new builds. Cameco at full production capacity (McArthur + Cigar Lake) by 2027, generating significant free cash flow at \$70-80/lb contract prices. Westinghouse order backlog expanding as utilities commit to SMRs and AP1000 large units. By 2033: Cameco transformed from pure miner to integrated nuclear fuel cycle company with Westinghouse reactor revenue. By 2038: the AI power crisis and climate mandates cement nuclear as critical infrastructure — Cameco the cornerstone Western supplier.

SCENARIO	HORIZON	PRICE TARGET	PROBABILITY	RATIONALE
■ BULL 2028	2028 (~2yr)	\$98.48	30%	Sector tailwinds maximised; financing secured; production ramp on track.
■ BASE 2028	2028 (~2yr)	\$77.82	45%	Execution on plan; commodity prices stable; BL 90d trajectory sustained.
■ BEAR 2028	2028 (~2yr)	\$76.90	25%	Chinese competition or commodity price correction; execution delays.
■ BULL 2033	2033 (~7yr)	\$98.28	25%	Full production at capacity; government offtake; re-rating as

				strategic asset.
■ BASE 2033	2033 (~7yr)	\$43.12	50%	Critical materials supply chain established; steady revenue compounding.
■ BEAR 2033	2033 (~7yr)	\$41.36	25%	Commodity cycle downturn; competitive substitution; margin compression.
■ BULL 2038	2038 (~12yr)	\$98.08	20%	National champion status; defence and clean energy supply fully secured.
■ BASE 2038	2038 (~12yr)	\$23.89	55%	Mature production; recurring government and OEM supply revenues.
■ BEAR 2038	2038 (~12yr)	\$22.24	25%	Technology disruption reduces commodity demand; margin erosion.

Note: Superforecasting projections use BL 90-day momentum trajectory, compounded annually at scenario-adjusted rates. All base prices from CIO watchlist (2026-08-13). Probability allocations are qualitative estimates. NOT investment advice.
