§ 1 INVESTMENT THESIS

Energy Fuels is uniquely positioned at the intersection of two critical supply chains: uranium (nuclear power) and rare earth elements (EV motors, wind turbines). The White Mesa Mill in Utah is the only conventional uranium mill operating in the United States — and Energy Fuels has repurposed its circuits to also separate rare earth element carbonate from monazite sands, becoming the first commercial-scale US rare earth separator. This dual-commodity, dual-supply-chain positioning is unmatched: uranium demand is surging with nuclear renaissance, while REE demand is exploding with EV and wind turbine buildout. White Mesa Mill is the strategic fulcrum of US critical minerals policy.

§ 2 BUSINESS MODEL ARCHITECTURE

Four revenue streams: (1) Uranium — mine and conventional mill production (Canyon, Pinon Plain, Sheep Mountain, La Sal complex); long-term utility contracts and spot sales; (2) REE Carbonate Separation — monazite processing at White Mesa (from Australian and US sources); produces mixed REE carbonate for further separation by Neo Performance or Lynas; (3) Vanadium — by-product vanadium recovery at White Mesa; vanadium redox flow battery optionality; (4) Medical Isotopes — Ra-226, Th-230 and other actinides from White Mesa for targeted alpha therapy cancer treatment. White Mesa Mill is the revenue hub for all four streams.

§ 3 COMPETITIVE MOAT ANALYSIS

White Mesa Mill NRC license is a national asset that cannot be replicated. No new conventional uranium mill has been permitted in the US since the 1980s; permitting a new mill would require 10-15 years and hundreds of millions. The REE monazite circuit is built within the existing licensed facility — a regulatory first-mover advantage no competitor can easily duplicate. DoD and DoE strategic relationship (Title III, Uranium Reserve purchases) creates government offtake security. Medical isotope revenue from actinides extracted at White Mesa is a high-margin, non-cyclical revenue stream.

Porter's Five Forces — Critical Materials

FORCE	ASSESSMENT
Rivalry (Industry Competition)	HIGH — Critical materials sector dominated by Chinese state-owned enterprises; Western producers compete with subsidised rivals.
Threat of New Entrants	HIGH — Resource permitting (5-15 years), capex (\$200M-\$2B), and processing expertise create barriers, but timelines matter.
Supplier Power	MEDIUM — Equipment and reagent suppliers; specialised SX-EW and REE separation reagents have limited Western sources.
Buyer Power	MEDIUM-HIGH — Large OEM buyers (GM, Ford, Boeing) have significant negotiating power; government buyers less price-sensitive.
Substitutes	MEDIUM — Battery chemistry evolution (NaS, LMFP) could reduce lithium/cobalt intensity; but REE magnets have no viable substitute for high-power density.

§ 4 FINANCIAL ANALYSIS

All financial data sourced from BL3 MySQL (snapshot: 2026-08-13) and moomoo OpenD API as at 2026-08-13. Zero training-data market figures used per CIO Absolute Market Data Standing Order 2026-08-13.

4.1 Valuation Metrics

P/E TTM: -43.91x — company is loss-making on TTM basis (negative P/E).

Forward P/E: -38.13x — consensus forecasts forward loss (negative forward P/E).

Price/Book: 4.57x — market applies 4.57x premium to book assets.

4.4 Blue Lotus Price Target Cascade

HORIZON	PRICE TARGET	UPSIDE	P(TARGET)	NOTE
7-Day Target	\$15.17	+4.9%	52.95%	Short-term momentum
14-Day Target	\$14.83	+2.6%	53.81%	Bi-weekly rebalancing
30-Day Target	\$14.15	-2.1%	55.12%	30-day regime-adjusted
60-Day Target	\$13.24	-8.5%	56.47%	Quarterly positioning
90-Day Target	\$12.29	-15.0%	57.63%	Quarterly conviction target

§ 5 RISK FRAMEWORK

The following five risk factors have been assessed across probability and severity dimensions within the CivilisationOS Bayesian risk architecture.

RISK FACTOR	SEVERITY	DESCRIPTION
Uranium Price Sensitivity	MEDIUM	Revenue fluctuates with U3O8 price; break-even ~\$55-60/lb for US ISR mines.
REE Separation Margin	MEDIUM	Mixed REE carbonate is early in value chain; full separation margins depend on downstream partners.
Mine Permitting Risk	MEDIUM	US uranium mine permitting on federal and tribal lands subject to legal challenge.
Competition from Kazakhstan ISR	MEDIUM	Kazatomprom can flood market with low-cost ISR uranium, capping price ceiling.
Vanadium Market Volatility	LOW	Vanadium price is highly volatile; small contribution to overall revenue.

§ 6 BLUE LOTUS SUPERFORECASTING

Uranium production ramp: Pinon Plain and Canyon mines provide contracted uranium supply into nuclear renaissance. REE carbonate production growing as monazite supply agreements expand (Australian producers, US deposits). By 2028: White Mesa as US REE processing hub — potential upgrade to full separated rare earth oxides (NdPr oxide, Dy/Tb), capturing full value chain. Medical isotope revenue from Ra-226 targeted therapy. By 2033: Energy Fuels is the only vertically integrated US uranium + REE + actinide producer — a national strategic asset.

SCENARIO	HORIZON	PRICE TARGET	PROBABILITY	RATIONALE
■ BULL 2028	2028 (~2yr)	\$17.23	30%	Sector tailwinds maximised; financing secured; production ramp on track.
■ BASE 2028	2028 (~2yr)	\$13.05	45%	Execution on plan; commodity prices stable; BL 90d trajectory sustained.
■ BEAR 2028	2028 (~2yr)	\$11.28	25%	Chinese competition or commodity price correction; execution delays.
■ BULL 2033	2033 (~7yr)	\$26.69	25%	Full production at capacity; government

				offtake; re-rating as strategic asset.
■ BASE 2033	2033 (~7yr)	\$10.09	50%	Critical materials supply chain established; steady revenue compounding.
■ BEAR 2033	2033 (~7yr)	\$6.07	25%	Commodity cycle downturn; competitive substitution; margin compression.
■ BULL 2038	2038 (~12yr)	\$41.35	20%	National champion status; defence and clean energy supply fully secured.
■ BASE 2038	2038 (~12yr)	\$7.80	55%	Mature production; recurring government and OEM supply revenues.
■ BEAR 2038	2038 (~12yr)	\$3.26	25%	Technology disruption reduces commodity demand; margin erosion.

Note: Superforecasting projections use BL 90-day momentum trajectory, compounded annually at scenario-adjusted rates. All base prices from CIO watchlist (2026-08-13). Probability allocations are qualitative estimates. NOT investment advice.
