

Firefly Aerospace (FLY)

Firefly Aerospace, Inc.

Sector: Small Launch Vehicle & Lunar Access | Exchange: NASDAQ | Country: United States

Live Price: \$27.300 | Report Date: 2026-08-13

CIO Live Price Source: Watchlist Screenshot, 2026-08-13

EXECUTIVE SUMMARY

Live Price (CIO)	\$27.300	Market Cap	\$4.61B
P/E TTM	-12.37x	P/E Forward	N/A
P/B Ratio	3.77x	EPS TTM	-\$2.10
EPS Forward	N/A	Net Income TTM	-\$351.05M
52-Week High	\$62.17	52-Week Low	\$16.00
Dividend Yield	None	Analyst Consensus	Buy
Analyst Price Target	\$38.00	BL 90-Day Target	N/A
BL Score	N/A	Market Regime	MILD RISK OFF

§ 1 INVESTMENT THESIS

Firefly Aerospace is the emerging challenger to Rocket Lab in the small-to-medium launch vehicle market. Its Alpha rocket (1,000 kg LEO) has demonstrated successful commercial launches after early failures. More strategically, Firefly's Blue Ghost lunar lander (launched Jan 2025) successfully landed on the Moon in March 2025—the second ever commercial lunar landing and first fully successful commercial lunar mission. NASA CLPS contracts (Commercial Lunar Payload Services) provide multi-mission revenue through the late 2020s.

§ 2 BUSINESS MODEL ARCHITECTURE

Three revenue pillars: (1) Alpha Rocket Launch Services—dedicated and rideshare launches for small satellite operators, 1,000 kg LEO capacity; (2) NASA CLPS Lunar Delivery—Blue Ghost lander missions to the Moon for NASA science payloads; (3) MLVS—Medium Launch Vehicle Service (partnering with Northrop Grumman on Antares replacement). Government contracts from NASA and DoD provide near-term revenue visibility.

§ 3 COMPETITIVE MOAT ANALYSIS

Blue Ghost's successful lunar landing creates an operational heritage that very few companies possess—only Intuitive Machines (IM-1) and Firefly have achieved commercial lunar surface access. This creates a credibility moat for future NASA and commercial lunar contracts. Alpha's vertical integration (engine, airframe, avionics all in-house) mirrors the SpaceX model at the small launch scale.

Porter's Five Forces

FORCE	ASSESSMENT
Rivalry (Industry Competition)	HIGH — Space sector consolidating; SpaceX dominates launch.
Threat of New Entrants	MEDIUM — Capital intensity and launch infrastructure create barriers.
Supplier Power	MEDIUM — Specialised aerospace components; titanium and propulsion suppliers.
Buyer Power	MEDIUM — Government monopsony buyer; commercial sector more fragmented.
Substitutes	LOW–MEDIUM — Depends on service type; ground-based systems for some applications.

§ 4 FINANCIAL ANALYSIS

All financial data sourced from moomoo OpenD API (snapshot: 2026-08-13) and moomoo OpenD API as at 2026-08-13. Zero training-data market figures used per CIO Absolute Market Data Standing Order 2026-08-13.

4.1 Valuation Metrics

P/E TTM: -12.37x — company is loss-making on TTM basis (negative P/E).

Price/Book: 3.77x — market applies 3.77x premium to book assets.

Net Income TTM: \$-351.05M | Source: BL3 MySQL net_income_ttm

4.2 52-Week Price Range

52-Week High: \$62.17 | 52-Week Low: \$16.00

Current Price \$27.300 sits at 24.5% of 52-week range (0%=52W Low, 100%=52W High) | Source: BL3 MySQL

4.4 Blue Lotus Price Target Cascade

BL Price Targets: Not available in BL3 MySQL ticker_forecasts for this ticker.

§ 5 RISK FRAMEWORK

The following five risk factors have been assessed across probability and severity dimensions within the CivilisationOS Bayesian risk architecture.

RISK FACTOR	SEVERITY	DESCRIPTION
Launch Cadence	HIGH	Alpha must achieve 6-8+ launches/year to reach cost competitiveness with Rocket Lab Electron.
Medium Launch Vehicle Uncertainty	HIGH	MLVS / Miranda medium rocket development depends on Northrop partnership continuity.
NASA Budget Risk	MEDIUM	CLPS programme funding subject to NASA appropriations cycles.
Competition	HIGH	Rocket Lab Electron dominates small launch; SpaceX Transporter rideshare competes on price.
Post-IPO Execution	MEDIUM	IPO in 2025; public company demands may divert focus from engineering execution.

§ 6 BLUE LOTUS SUPERFORECASTING

Blue Ghost lunar landing success is the credibility catalyst. Firefly targeting 20+ Alpha launches/year by 2027 would approach profitability. NASA Artemis programme growth and commercial lunar economy expansion creates a long runway for CLPS contracts. Miranda medium rocket (if successful) opens a \$5-8B annual medium launch market.
