§ 1 INVESTMENT THESIS

Globalstar's investment thesis is entirely transformed by Apple's \$1.5B+ investment (2022-2026) and exclusive use of Globalstar's network for iPhone Emergency SOS via Satellite. Apple is both anchor customer and de facto equity sponsor, committing to deploy Globalstar network capacity and build replacement satellites. This transforms Globalstar from a distressed satellite operator into an Apple infrastructure utility—an unprecedented arrangement in satellite history.

§ 2 BUSINESS MODEL ARCHITECTURE

Two revenue pillars: (1) Apple Partnership—wholesale capacity payments from Apple for Emergency SOS via Satellite (iPhone 14/15/16/17 series), Apple Watch, and future Apple devices including potential global messaging; (2) Legacy Commercial & Government—IoT asset tracking, satellite phone services, SPOT consumer personal trackers. Apple now represents >70% of Globalstar revenue, creating concentration risk but also unparalleled stability from a AAA-rated anchor.

§ 3 COMPETITIVE MOAT ANALYSIS

Apple's exclusive multi-year agreement creates a structural moat of extraordinary depth—Apple has deployed Globalstar across all iPhone 14+ devices globally (1B+ iPhones in circulation). Switching costs for Apple are enormous: rebuilding satellite ground network, re-certifying with regulators, re-training consumer behaviour on emergency services. The Apple relationship is the moat.

Porter's Five Forces

FORCE	ASSESSMENT
Rivalry (Industry Competition)	HIGH — Space sector consolidating; SpaceX dominates launch.
Threat of New Entrants	MEDIUM — Capital intensity and launch infrastructure create barriers.
Supplier Power	MEDIUM — Specialised aerospace components; titanium and propulsion suppliers.
Buyer Power	MEDIUM — Government monopsony buyer; commercial sector more fragmented.
Substitutes	LOW–MEDIUM — Depends on service type; ground-based systems for some applications.

§ 5 RISK FRAMEWORK

The following five risk factors have been assessed across probability and severity dimensions within the CivilisationOS Bayesian risk architecture.

RISK FACTOR	SEVERITY	DESCRIPTION
Apple Contract Renewal Risk	HIGH	Apple partnership renewal terms post-2026 are the single most important company event.
Satellite Degradation	HIGH	Aging legacy constellation (pre-2013 satellites) degrades; Apple-funded replacement timeline matters.
Apple Walks Away Risk	MEDIUM	If Apple builds its own satellite capability, Globalstar loses its anchor.
Legacy Revenue Decline	LOW	SPOT consumer tracker and satellite phone revenue declining as

		smartphones substitute.
Dilution Risk	MEDIUM	Apple warrants and convertible debt create shareholder dilution as Apple exercises rights.

§ 6 BLUE LOTUS SUPERFORECASTING

If Apple renews and expands to global messaging (iMessage satellite, FindMy satellite, etc.), Globalstar becomes a persistent Apple satellite infrastructure play with \$1B+ ARR. The valuation depends entirely on whether Apple's exclusive expands or narrows post-2026.

SCENARIO	HORIZON	PRICE TARGET	PROBABILITY	RATIONALE
■ BULL 2028	2028 (~2yr)	\$94.71	30%	Sector tailwinds maximised; key catalysts achieved; margin expansion.
■ BASE 2028	2028 (~2yr)	\$72.53	45%	Execution on plan; market conditions neutral; BL 90d trajectory sustained.
■ BEAR 2028	2028 (~2yr)	\$65.02	25%	Key risk materialises; execution delays; macro headwinds compress valuation.
■ BULL 2033	2033 (~7yr)	\$130.42	25%	Full TAM penetration; profitability achieved; re-rating to sector leader multiples.
■ BASE 2033	2033 (~7yr)	\$51.26	50%	Steady compounding at BL trajectory; space economy matures.
■ BEAR 2033	2033 (~7yr)	\$34.97	25%	Competitive displacement or regulatory headwinds impair revenue trajectory.
■ BULL 2038	2038 (~12yr)	\$179.60	20%	Cislunar economy, AI integration, spectrum monetisation at full scale.
■ BASE 2038	2038 (~12yr)	\$36.23	55%	Space infrastructure buildout completed; recurring revenue

				dominant.
■ BEAR 2038	2038 (~12yr)	\$18.81	25%	Technology disruption or market consolidation erodes competitive position.
