§ 1 INVESTMENT THESIS

Spire Global operates a 110+ satellite LEO constellation delivering three simultaneous data streams from space: weather intelligence (GNSS-RO atmospheric sensing superior to traditional radiosondes), maritime AIS tracking (global vessel visibility), and aviation ADS-B tracking. Spire sells data-as-a-service to government agencies, weather services, hedge funds, and shipping companies. A single satellite constellation serves multiple revenue streams simultaneously—a unique architecture in the Earth observation sector.

Blue Lotus Forecast Signal: 90-day price target \$29.70 (upside +109.5%) | P(target reached): 65.5% | BL Score: 15.5000 | Regime: MILD RISK OFF

§ 2 BUSINESS MODEL ARCHITECTURE

SaaS subscription model: (1) Space Services—turnkey satellite operations for third parties using Spire's bus, ground network, and software; (2) Weather Services—atmospheric data sold to NOAA, ECMWF, insurance companies, agriculture; (3) Maritime Services—vessel tracking AIS subscriptions for port authorities, commodities traders; (4) Aviation Services—global ADS-B flight tracking for airlines, FIRs.

§ 3 COMPETITIVE MOAT ANALYSIS

110+ satellites creating global coverage with 30-minute refresh rates—orbital diversity creates persistent data coverage unmatched by smaller constellations. GNSS-RO weather data outperforms balloon radiosondes in spatial resolution and cost. Government anchor contracts (NOAA, ECMWF) validate data quality and provide recurring revenue.

Porter's Five Forces

FORCE	ASSESSMENT
Rivalry (Industry Competition)	HIGH — Space sector consolidating; SpaceX dominates launch.
Threat of New Entrants	MEDIUM — Capital intensity and launch infrastructure create barriers.
Supplier Power	MEDIUM — Specialised aerospace components; titanium and propulsion suppliers.
Buyer Power	MEDIUM — Government monopsony buyer; commercial sector more fragmented.
Substitutes	LOW–MEDIUM — Depends on service type; ground-based systems for some applications.

§ 5 RISK FRAMEWORK

The following five risk factors have been assessed across probability and severity dimensions within the CivilisationOS Bayesian risk architecture.

RISK FACTOR	SEVERITY	DESCRIPTION
NOAA Contract Dependency	HIGH	NOAA commercial weather data programme re-competition could reduce government revenue.
Competition from Clyde/PlanetIQ	MEDIUM	ClimaCell, Tomorrow.io, and PlanetIQ compete in commercial weather data.
Satellite Lifecycle Management	MEDIUM	Constellation refresh capex required

every 5-7 years; FCF pressure.

Path to Profitability	HIGH	Company has not yet achieved consistent operating profitability.
Space Services Margin	LOW	Space Services (manufacturing) is lower margin than pure data subscriptions.

§ 6 BLUE LOTUS SUPERFORECASTING

If NOAA's commercial weather data purchase programme expands (projected \$500M/year by 2028), Spire is a primary beneficiary. Maritime and aviation data subscriptions compound annually with global AIS/ADS-B regulatory requirements expanding. The multi-use constellation architecture is fundamentally more capital-efficient than single-purpose Earth observation.

SCENARIO	HORIZON	PRICE TARGET	PROBABILITY	RATIONALE
■ BULL 2028	2028 (~2yr)	\$41.65	30%	Sector tailwinds maximised; key catalysts achieved; margin expansion.
■ BASE 2028	2028 (~2yr)	\$26.41	45%	Execution on plan; market conditions neutral; BL 90d trajectory sustained.
■ BEAR 2028	2028 (~2yr)	\$11.06	25%	Key risk materialises; execution delays; macro headwinds compress valuation.
■ BULL 2033	2033 (~7yr)	\$616.39	25%	Full TAM penetration; profitability achieved; re-rating to sector leader multiples.
■ BASE 2033	2033 (~7yr)	\$125.15	50%	Steady compounding at BL trajectory; space economy matures.
■ BEAR 2033	2033 (~7yr)	\$5.95	25%	Competitive displacement or regulatory headwinds impair revenue trajectory.
■ BULL 2038	2038 (~12yr)	\$9122.05	20%	Cislunar economy, AI integration, spectrum monetisation at full

				scale.
■ BASE 2038	2038 (~12yr)	\$593.01	55%	Space infrastructure buildout completed; recurring revenue dominant.
■ BEAR 2038	2038 (~12yr)	\$3.20	25%	Technology disruption or market consolidation erodes competitive position.
