§ 1 INVESTMENT THESIS

Hecla Mining is the largest primary silver producer in the United States and North America — the only major silver company with all operations in AAA-rated mining jurisdictions (USA and Canada). The Lucky Friday mine (Idaho, USA) and Greens Creek (Alaska, USA) are two of the world's premier silver mines. Lucky Friday (100% Hecla) is the highest-grade primary silver mine in the US; Greens Creek (Alaska, 29.7 Moz Ag reserve, operated by Hecla, 82.25%) is among the world's lowest-cost silver mines at <\$5/oz AISC. The Hecla thesis is US-jurisdiction purity: while competitors operate in Mexico, Peru, and Bolivia with political risk, Hecla's exclusively North American portfolio commands a structural valuation premium. The Casa Berardi mine (Quebec, Canada) adds gold production following the Alexco Silver acquisition (Yukon).

■ BL Signal: 90d target \$10.52 (-40.4%) | P=64.6% | BL Score: 14.5872 | Regime: MILD RISK ON

§ 2 BUSINESS MODEL ARCHITECTURE

Four operating mines: (1) Greens Creek (Alaska, 82.25%; Kennecott 17.75%); world-class silver-gold-zinc-lead VMS deposit; ~9-10 Moz Ag + 65-70 Koz Au/year; (2) Lucky Friday (Idaho, 100%; reopened 2022 post-fire rebuild); ~4-5 Moz Ag/year at high-grade (>12 oz/ton); (3) Casa Berardi (Quebec, 100%); ~100-120 Koz Au/year; (4) Keno Hill (Yukon, Canada, 100%, from Alexco acquisition); silver-gold; ramping production. Revenue: silver doré and base metal concentrate (LBMA spot); gold doré; zinc and lead concentrate credits. Hecla is the most silver-leveraged large-cap precious metals company.

§ 3 COMPETITIVE MOAT ANALYSIS

US jurisdiction is Hecla's irreplaceable moat: Greens Creek and Lucky Friday operate in Alaska and Idaho under established, stable regulatory frameworks. No expropriation risk. Lucky Friday's 94+ year mine history means the geological resource is well-understood; extensions at depth continue. Greens Creek's polymetallic VMS deposit (silver, gold, zinc, lead) provides by-product credits that offset silver cash costs to near-zero — making it one of the world's most profitable silver mines. IRA domestic silver production benefits could create government offtake premium for domestically mined US silver.

Porter's Five Forces — Gold & Silver Mining

FORCE	ASSESSMENT
Rivalry	HIGH — Top 5 gold majors (Newmont, Barrick, Agnico, AngloGold, Gold Fields) compete for acquisition targets and investor capital.
New Entrants	LOW — Mine permitting 10-20 years; sovereign risk; metallurgical complexity; capital intensity (\$500M-\$5B+) deter new entrants.
Supplier Power	MEDIUM — Reagents (cyanide, lime), explosives, and mining equipment (Caterpillar, Sandvik) — multi-year contracts; limited alternatives.
Buyer Power	LOW-MEDIUM — Gold/silver sell at spot (LBMA/COMEX); no single buyer; refiners and central banks buy at market price.
Substitutes	LOW — No substitute for gold/silver in monetary, investment, or industrial applications (conductivity, corrosion resistance).

§ 4 FINANCIAL ANALYSIS

All data from BL3 MySQL (snapshot: 2026-08-13) + moomoo OpenD. Zero training-data figures. CIO Standing Order 2026-08-13.

4.1 Valuation Metrics

P/E TTM: 35.57x — profitable on trailing basis.

Forward P/E: 36.30x

Price/Book: 4.46x

Net Income TTM: \$329.17M | Source: BL3 MySQL

EPS TTM: \$0.49 | EPS Forward: \$3.99

4.2 52-Week Price Range

52-Week High: \$34.16 | 52-Week Low: \$7.39

CIO Price \$17.640 at 38.3% of 52W range | Source: BL3 MySQL

4.3 Analyst Intelligence

Consensus: Buy | Target: \$23.63 | Analysts: 6

Buy: 50% | Hold: 50% | Sell: 0%

§ 5 RISK FRAMEWORK

Five risk factors assessed within the CivilisationOS Bayesian risk architecture.

RISK FACTOR	SEVERITY	DESCRIPTION
Lucky Friday Underground Risk	MEDIUM	Underground Idaho mine with fire/flood/seismic risk; productivity dependent on ground conditions.

Silver Price Sensitivity	HIGH	Hecla is the highest-beta silver stock; \$5/oz silver move = 20-30% EBITDA impact.
Casa Berardi Performance	MEDIUM	Quebec gold mine has underperformed expectations; requires operational improvement.
Keno Hill Ramp Risk	MEDIUM	Alexco Keno Hill acquisition; ramp to production requires capital and execution.
Zinc/Lead Price Exposure	LOW	Greens Creek base metal credits fluctuate; benefit Hecla when zinc/lead prices are high.

§ 6 BLUE LOTUS SUPERFORECASTING

Lucky Friday full production (post-rebuild) and Keno Hill ramp are the near-term production catalysts. At \$30+/oz silver, Hecla generates significant FCF from Greens Creek alone. By 2028: Hecla at 14-16 Moz Ag/year (Greens Creek + Lucky Friday + Keno Hill); Casa Berardi optimised; Hecla highest-leverage silver stock among US-listed names. By 2033: Potential silver deficit supports \$40-50/oz; Hecla's US production premium attracts defence/industrial premium pricing. By 2038: Hecla as the premier North American silver asset portfolio.

SCENARIO	HORIZON	PRICE TARGET	PROBABILITY	RATIONALE
■ BULL 2028	2028 (~2yr)	\$16.42	30%	Gold \$3,000+ / Silver \$40+; all expansion catalysts hit.
■ BASE 2028	2028 (~2yr)	\$13.21	45%	Gold \$2,500-2,800; silver \$28-35; BL trajectory sustained.
■ BEAR 2028	2028 (~2yr)	\$13.76	25%	Gold correction to \$1,800-2,000; risk-on reduces safe haven flows.
■ BULL 2033	2033 (~7yr)	\$13.73	25%	De-dollarisation accelerates; gold \$3,500-4,000; silver re-rated.
■ BASE 2033	2033 (~7yr)	\$6.42	50%	Gold \$3,000+; steady mine production; FCF compounding.
■ BEAR 2033	2033 (~7yr)	\$7.40	25%	Global deflation; USD strengthens; precious metals de-rated.

■ BULL 2038	2038 (~12yr)	\$11.48	20%	Gold \$5,000+; silver \$80+; multipolarity fully priced in.
■ BASE 2038	2038 (~12yr)	\$3.12	55%	Gold \$3,500-4,500; mature production; dividends sustained.
■ BEAR 2038	2038 (~12yr)	\$3.98	25%	New energy metal replaces gold as safe haven; gold de-rated.

Note: Projections use BL 90-day trajectory compounded annually. Base prices from CIO watchlist 2026-08-13. NOT investment advice.
