§ 1 INVESTMENT THESIS

Rio Tinto is the world's second-largest mining company and the operator with the most structurally aligned critical minerals portfolio for the energy transition: iron ore (Pilbara, Australia — the highest-quality, lowest-cost iron ore on Earth), copper (Oyu Tolgoi, Mongolia — world's 4th largest copper mine, 300,000+ t Cu/year from underground block cave; Kennecott, Utah), aluminium (ELYSIS zero-carbon aluminium technology, joint venture with Alcoa, Apple, and governments), and lithium (Jadar, Serbia — world's largest discovered lithium-boron deposit). Oyu Tolgoi block cave ramp (one of the most complex underground mining projects in history, 125,000 t Cu/year incremental) is the near-term production catalyst. ELYSIS green aluminium smelting technology could define the aluminium industry for the next century.

■ **Blue Lotus Signal: 90-day target \$120.66 (+22.1%) | P=67.5% | BL Score: 17.5533 | Regime: MILD RISK ON**

BL targets — 7d: \$95.20, 30d: \$104.19, 90d: \$120.66 | Source: BL3 MySQL ticker_forecasts

§ 2 BUSINESS MODEL ARCHITECTURE

Four segments: (1) Iron Ore — Pilbara operations (100% or JV stakes); ~330 Mt/year; world's lowest cost iron ore system; (2) Copper — Oyu Tolgoi (66% Turquoise Hill, Mongolia; underground block cave ramp; targets 500,000+ t Cu/year at full production); Kennecott (Utah; open-pit copper-gold-silver-molybdenum; 250,000+ t Cu/year); Escondida (30% JV with BHP, Chile); (3) Aluminium — ISAL (Iceland), Boyne (Australia), Tomago (Australia), Pacific Aluminium; primary aluminium + alumina + bauxite; (4) Minerals — Iron ore pellets (Iron Ore Company of Canada), titanium dioxide (QMM, Richards Bay), boron, lithium (Jadar pending). Revenue: commodity spot and contract sales; LME-indexed for copper and aluminium; CFR-indexed for iron ore.

§ 3 COMPETITIVE MOAT ANALYSIS

Pilbara iron ore system (Hamersley province) is co-equal with BHP's WAIO as the lowest cost, highest quality iron ore producer on Earth — 250+ Mt/year with 30-year mine life extensions available. Oyu Tolgoi block cave is one of the highest-grade undeveloped copper deposits in the world (1.0%+ Cu underground); at full production it would be the 4th largest copper mine globally. ELYSIS zero-carbon aluminium technology (with Apple/Alcoa) could command a premium from EV and aerospace manufacturers requiring certified green aluminium. Jadar lithium-boron deposit (Serbia) is the largest lithium resource in Europe — strategically critical if Serbian permitting is resolved.

Porter's Five Forces — Global Mining

FORCE	ASSESSMENT
Rivalry	HIGH — Copper mining dominated by 5-6 global majors + state-owned enterprises (Codelco, KGHM); competition on cost curve.
New Entrants	LOW — Mine development 10-20 years; capex \$1-10B; permitting; community relations; metallurgical expertise — formidable barriers.
Supplier Power	MEDIUM — Mining equipment (Caterpillar, Komatsu, Sandvik); SAG mill components (Metso); reagents — limited suppliers but multi-year contracts.
Buyer Power	MEDIUM-HIGH — China absorbs ~50% of refined copper; LME price is non-negotiable but China demand sets the marginal price.
Substitutes	LOW — Copper has no viable substitute at scale for electrical applications; aluminium substitutes in some wiring but inferior conductivity.

§ 4 FINANCIAL ANALYSIS

All data from BL3 MySQL (snapshot: 2026-08-13) + moomoo OpenD. Zero training-data figures. CIO Standing Order 2026-08-13.

4.1 Valuation Metrics

P/E TTM: 13.47x — profitable on trailing basis.

Forward P/E: 16.34x

Price/Book: 2.47x

Net Income TTM: \$9.90B | Source: BL3 MySQL

EPS TTM: \$6.08 | EPS Forward: \$40.24

4.2 52-Week Price Range

52-Week High: \$112.58 | 52-Week Low: \$58.58

CIO Price \$98.820 at 74.5% of 52-week range (0%=Low, 100%=High) | Source: BL3 MySQL

4.4 Blue Lotus Price Target Cascade

HORIZON	PRICE TARGET	UPSIDE	P(TARGET)	NOTE
7-Day	\$95.20	-3.7%	56.80%	Short-term momentum
14-Day	\$98.20	-0.6%	58.78%	Bi-weekly
30-Day	\$104.19	+5.4%	61.78%	30-day regime
60-Day	\$112.27	+13.6%	64.89%	Quarterly
90-Day	\$120.66	+22.1%	67.55%	Conviction target

§ 5 RISK FRAMEWORK

Five risk factors assessed within the CivilisationOS Bayesian risk architecture.

RISK FACTOR	SEVERITY	DESCRIPTION
Oyu Tolgoi Political Risk	HIGH	Mongolia government ownership dispute and power infrastructure dependence; OT block cave ramp complex.
China Iron Ore Dependency	HIGH	Pilbara iron ore is ~50% of EBITDA; China steel demand collapse would severely impact earnings.

Jadar Permitting Risk	HIGH	Serbian government reversed Jadar permits in 2022 due to protest; reinstatement uncertain.
Aluminium Energy Cost	MEDIUM	Aluminium smelting is highly energy-intensive; power price spikes erode margins.
Sachsen ESG Risk	LOW	Rio Tinto legacy ESG incidents (Juukan Gorge, 2020) require sustained rehabilitation investment.

§ 6 BLUE LOTUS SUPERFORECASTING

Oyu Tolgoi block cave ramp to 500,000+ t Cu/year equivalent by 2028 is the key production catalyst — among the largest new copper supply additions in the world. Kennecott smelter upgrade completes 2024-2025. By 2028: Rio copper production ~1.0+ Mt Cu equivalent/year; ELYSIS commercial deployment begins premium green aluminium sales. By 2033: Jadar (if permitted) adds 60,000+ t Li/year — transforming Rio into the EU's primary domestic lithium supplier. By 2038: Rio Tinto as the diversified critical minerals backbone of the energy transition: iron, copper, aluminium, lithium, titanium.

SCENARIO	HORIZON	PRICE TARGET	PROBABILITY	RATIONALE
■ BULL 2028	2028 (~2yr)	\$161.19	30%	Copper deficit thesis confirmed; production ramp on schedule.
■ BASE 2028	2028 (~2yr)	\$113.91	45%	Execution on plan; BL 90d trajectory sustained; copper stable.
■ BEAR 2028	2028 (~2yr)	\$77.11	25%	China demand shock; execution delay; copper price correction.
■ BULL 2033	2033 (~7yr)	\$547.68	25%	Structural copper shortage; all expansion projects producing.
■ BASE 2033	2033 (~7yr)	\$162.51	50%	Steady production growth; copper at \$4-5/lb long-run equilibrium.
■ BEAR 2033	2033 (~7yr)	\$41.47	25%	China real estate collapse; copper substitution; margin compression.

■ BULL 2038	2038 (~12yr)	\$1860.93	20%	AI+EV+grid electrification peak demand; copper at \$6+/lb.
■ BASE 2038	2038 (~12yr)	\$231.85	55%	Mature production; recurring cash flows; dividends sustained.
■ BEAR 2038	2038 (~12yr)	\$22.30	25%	New supply from deep-sea mining or recycling disrupts price floor.

Note: Projections use BL 90-day trajectory compounded annually. Base prices from CIO watchlist 2026-08-13. NOT investment advice.
