§ 1 INVESTMENT THESIS

Teck Resources is undergoing a strategic transformation from a diversified coal-copper-zinc miner into a pure-play copper and zinc company following the sale of its steelmaking coal business (Elk Valley Resources) to Glencore for ~\$9 billion. The proceeds fund the QB2 (Quebrada Blanca Phase 2) copper mine ramp in Chile — one of the largest copper development projects of the past decade — which adds >300,000 tonnes of copper annually at full production. Combined with existing operations (Highland Valley, Carmen de Andacollo, Antamina JV), Teck is targeting 800,000+ tonnes of copper equivalent production by 2028. The copper thesis is straightforward: AI, EVs, and grid electrification are structural copper demand drivers with no viable substitutes at scale. Teck's QB2 is one of the largest new copper supply sources in the Western Hemisphere.

Blue Lotus Signal: 90-day target \$42.15 (-34.5%) | P=68.2% | BL Score: 18.2500 | Regime: MILD RISK OFF

§ 2 BUSINESS MODEL ARCHITECTURE

Post-EVR coal sale (closing 2023-2024), two segments: (1) Copper — QB2 (75% interest, 4th largest copper mine in Chile once at full production; 316,000 t Cu/year); Highland Valley (B.C., Canada; largest open-pit copper mine in Canada; ~130,000 t Cu/year); Carmen de Andacollo (Chile; ~50,000 t Cu/year); Antamina JV (Peru; 22.5% stake; world's largest zinc-copper mine); (2) Zinc — Red Dog (Alaska; world's largest zinc mine; ~550,000 t Zn/year); Trail Operations (B.C.; zinc-lead smelter + specialty metals). Revenue: copper and zinc concentrate sales (LME-based); molybdenum and silver credits; refined zinc/lead from Trail.

§ 3 COMPETITIVE MOAT ANALYSIS

QB2 is a 50-year mine life asset in Chile's Antofagasta region — the heart of the world's highest-grade copper belt. First quartile on the copper cost curve once ramped. Red Dog zinc mine in Alaska is the world's largest zinc mine (80% of US domestic zinc supply), operating under a long-term surface use agreement with NANA Regional Corporation that provides social licence security. Antamina JV is one of the world's top 10 copper mines and a perpetual low-cost cash flow generator. Teck's \$9B+ coal sale war chest enables debt elimination and shareholder returns while QB2 ramps.

Porter's Five Forces — Global Mining

FORCE	ASSESSMENT
Rivalry	HIGH — Copper mining dominated by 5-6 global majors + state-owned enterprises (Codelco, KGHM); competition on cost curve.
New Entrants	LOW — Mine development 10-20 years; capex \$1-10B; permitting; community relations; metallurgical expertise — formidable barriers.
Supplier Power	MEDIUM — Mining equipment (Caterpillar, Komatsu, Sandvik); SAG mill components (Metso); reagents — limited suppliers but multi-year contracts.
Buyer Power	MEDIUM-HIGH — China absorbs ~50% of refined copper; LME price is non-negotiable but China demand sets the marginal price.
Substitutes	LOW — Copper has no viable substitute at scale for electrical applications; aluminium substitutes in some wiring but inferior conductivity.

§ 4 FINANCIAL ANALYSIS

All data from BL3 MySQL (snapshot: 2026-08-13) + moomoo OpenD. Zero training-data figures. CIO Standing Order 2026-08-13.

4.1 Valuation Metrics

P/E TTM: 17.82x — profitable on trailing basis.

Forward P/E: 32.05x

Price/Book: 1.61x

Net Income TTM: \$995.92M | Source: BL3 MySQL

EPS TTM: \$2.03 | EPS Forward: \$40.35

4.2 52-Week Price Range

52-Week High: \$71.15 | 52-Week Low: \$30.75

CIO Price \$64.370 at 83.2% of 52-week range (0%=Low, 100%=High) | Source: BL3 MySQL

4.3 Wall Street Analyst Intelligence

Consensus: Buy | Target: \$66.17 | Analysts: 3

Buy: 66% | Hold: 33% | Sell: 0%

Analyst Upside vs CIO: +2.8%

4.4 Blue Lotus Price Target Cascade

HORIZON	PRICE TARGET	UPSIDE	P(TARGET)	NOTE
7-Day	\$61.44	-4.6%	57.07%	Short-term momentum
14-Day	\$59.17	-8.1%	59.13%	Bi-weekly
30-Day	\$54.63	-15.1%	62.24%	30-day regime
60-Day	\$48.50	-24.7%	65.49%	Quarterly
90-Day	\$42.15	-34.5%	68.25%	Conviction target

Source: BL3 MySQL ticker_forecasts | regime: MILD RISK OFF

§ 5 RISK FRAMEWORK

Five risk factors assessed within the CivilisationOS Bayesian risk architecture.

RISK FACTOR	SEVERITY	DESCRIPTION
QB2 Ramp Execution Risk	HIGH	QB2 ramp has experienced delays; achieving 316,000 t/year nameplate is the key operating challenge.

Chile Political Risk	MEDIUM	Chile royalty reform and new constitution discussions add regulatory uncertainty.
Copper Price Cyclicalilty	HIGH	Revenue highly correlated to copper price; commodity cycle creates earnings volatility.
Red Dog Depletion	MEDIUM	Red Dog mine life extends to ~2031; Teck must develop Anarraaq deposit to extend zinc production.
Capital Returns Discipline	MEDIUM	Post-EVR cash windfall must be allocated to buybacks/dividends vs further M&A; execution risk.

§ 6 BLUE LOTUS SUPERFORECASTING

QB2 ramp to nameplate (316,000 t Cu/year) by 2025-2026 is the primary catalyst. Full QB2 production plus Highland Valley + Antamina makes Teck a top-5 non-state copper producer globally. By 2028: ~700,000-800,000 t Cu equivalent/year; Red Dog still operating; Trail upgraded with bleed technology for specialty metals. By 2033: Teck is a pure copper + zinc growth company; potential value-unlocking spin-off of zinc business or full-company acquisition by a major seeking low-cost Americas copper. By 2038: QB2 at full maturity generating ~\$2-3B/year free cash flow at \$4+ copper prices; potential second wave of Chilean copper development.

SCENARIO	HORIZON	PRICE TARGET	PROBABILITY	RATIONALE
■ BULL 2028	2028 (~2yr)	\$63.60	30%	Copper deficit thesis confirmed; production ramp on schedule.
■ BASE 2028	2028 (~2yr)	\$50.41	45%	Execution on plan; BL 90d trajectory sustained; copper stable.
■ BEAR 2028	2028 (~2yr)	\$50.23	25%	China demand shock; execution delay; copper price correction.
■ BULL 2033	2033 (~7yr)	\$61.73	25%	Structural copper shortage; all expansion projects producing.
■ BASE 2033	2033 (~7yr)	\$27.35	50%	Steady production growth; copper at \$4-5/lb long-run equilibrium.

■ BEAR 2033	2033 (~7yr)	\$27.01	25%	China real estate collapse; copper substitution; margin compression.
■ BULL 2038	2038 (~12yr)	\$59.91	20%	AI+EV+grid electrification peak demand; copper at \$6+/lb.
■ BASE 2038	2038 (~12yr)	\$14.84	55%	Mature production; recurring cash flows; dividends sustained.
■ BEAR 2038	2038 (~12yr)	\$14.53	25%	New supply from deep-sea mining or recycling disrupts price floor.

Note: Projections use BL 90-day trajectory compounded annually. Base prices from CIO watchlist 2026-08-13. NOT investment advice.
